

# CXR ISMS-1

## INTEGRATED SERVICE MANAGEMENT SYSTEM FOR RTDI-310 SERIES

### Description

ISMS-1 is a management tool running on windows which can manage mobile routers. All of the managed device information can be gathered to the ISMS-1, one interface for all managed devices.

ISMS-1 provides powerful upgrade function. Once the firmware is selected to upgrade, ISMS-1 takes care of the action and it will upgrade new firmware to device one by one. Upgrade status is also shown in the GUI for easy management.

Dash board provides overall information in one page. It provides current managed devices status and past 3 day history status.

### Features

- Manage up to 32 devices
