Description

The QX3440-6G703-64K-CDM plug-in card is designed for the single slot of CXR-QX3440 series. This interface supports 64 kbps data transport using the G.703 co-directional or contra-directional timing standard over a balanced wire.

The QX3440-6G703-64K-CDM card provides three co-directional/contra-directional mode options for different field requirements: (a) Co-directional + Contra-directional controlling (DCE) mode, (b) Co-directional + Contra-directional subordinate (DTE) mode, and (c) Mixed mode.

The QX3440-6G703-64K-CDM card supports diagnostics and alarms. This allows diagnostics and fault isolation.
