*SWD-HE-8TX is an unmanaged ruggedized Ethernet switch designed for most stringent environments such as Electric Substations or Railway infrastructures.*

SWD-HE-8TX comes in a robust and IP30 aluminum enclosure. It is made of industry grade components to operate over a wide -40 to +75 °C temperature range and even up to +85 °C for limited periods of time.

SWD-HE-8TX is not only shock and vibration resistant, but also it complies with the most severe Electromagnetic Immunity standards for railway infrastructures (EN 50121-4) and Electric Substations (IEC 61850 and IEEE 1613).

SWD-HE-8TX is offered with a choice of 10/100BaseT copper interfaces and optical ports for 2 km Multi-Mode and 20 km long range Single-Mode fibers also with single fiber WDM option.

SWD-HE-8TX is made for DIN rail mounting with good resistance to vibrations and shocks. It can be mounted in a 19" shelf through an optional mounting kit.

SWD-HE-8TX has two redundant power supply inputs with 12 to 48 Vdc range. It has also a 12 Vdc power backup input.

### APPLICATIONS
