

Tele-Mate® Series Telephone Test Sets

TM-500, TM-500UK and TM-500i

TESTING | TROUBLESHOOTING | ACCURACY

Easy to Use, DSL Compatible Telephone Test Set.

Updated and improved by Tempo, the Tele-Mate® Telephone Test Set is designed to help technicians install, service and maintain voice service with ease. Able to tackle the complexities of today's analog tele-communication lines, the TM-500 offers the convenience of line powered (no battery needed) operation and useful features like a high impedance monitor that is data and DSL safe, polarity test, speed dial, last number dialed and pulse dialing, making a technician more productive. The TM-500 not only works in handset mode, but can be used with the headset (included) for easy hands-free operation. The TM-500 is safe to operate with over-voltage and current detection.

Features

- Luminescent (glow-in-the-dark) keypad
- Can be used safely on a DSL enabled line
- High Impedance Monitor for monitoring line without disrupting existing traffic
- Over voltage and over current protection
- Tone and Pulse dialing for versatility on old and new phone lines
- Polarity test with LED indicator
- 32 digit last number redial and pause
- 10 number speed dial
- Adjustable volume control plus mute
- Pause
- Flash to generate a timed break recall
- Line powered, no battery needed
- Headset (included) for hands free operation
- RJ11 socket

NOTE 1: The TM-500i contains standard, small croc clips that do not pierce wiring. ABN style clips are also known as 'bed of nails' plus spike since they pierce the wiring for testing.
